

ISMIC 06/07 Intrinsically Safe Headsets

Spector Lumenex ISMIC 06/07 headset is designed to provide reliable efficient two way voice communication in a hazardous hostile environment.

The unit facilitates intelligible speech in extremely high noise ambience.

The headset incorporates an 'ear defender' construction for personal health and safety ear protection, and a noise cancelling 'boom' microphone capsule that enables effective transmission of users speech.

The assembly is supplied with a 1 metre retractable cable as standard with termination in a sealed 5 pin male lockable plug. ISMIC 06/07 is certified for operation with the Spector / Lumenex Mentor range of intercom stations, Mentor Digital Ex7711 series and Mentor Orbital 7400/0 series.

The ISMIC 06/07 headset is Zone 1 certified for use in hazardous areas, protection concept is intrinsically safe.
