

Firephone 400 Hot Line Telephone

The FP400X (Slave) facilitates extension of a FP400X (please see Data Sheet PM0112) telephone exchange from the maximum of forty subscribers to an additional ultimate of one hundred subscribers.

The unit comprises of an operator panel (which is fitted as part of the exchange assembly or can be supplied separately to allow remote control of the Fire hot line telephone system) and up to sixty way exchange. The operator panel carries a push button / LED array that allows the operator to determine telephone subscriber waiting / call in as well as subscriber selection. The exchange is designed for standard 19 inch cubicle execution and is equipped with modular plug in / out electronics hardware (Each plug in board facilitates connection of up to five subscribers therefore a fully loaded unit will be assigned twelve line cards.)

This shows a FP400X 40 way Firephone 400 unit with additional FP400X (Slave) to allow extension of subscriber connection capability.
