H₂S / Toxic Gas Breathing Air Services

State of the art gas detection and respiratory systems provide early warning of toxic gas and protection against that risk. Tyco Fire & Integrated Solutions can provide these solutions.

visit www.tycofis.co.uk and find out how Tyco Fire & Integrated Solutions can become a vital part of your business.

a vital part of your world

Tyco Fire & Integrated Solutions are the premium provider of H₂S Safety Services and Breathing Air Systems with over 25 years experience both in the North Sea and other Global Oil and Gas locations.

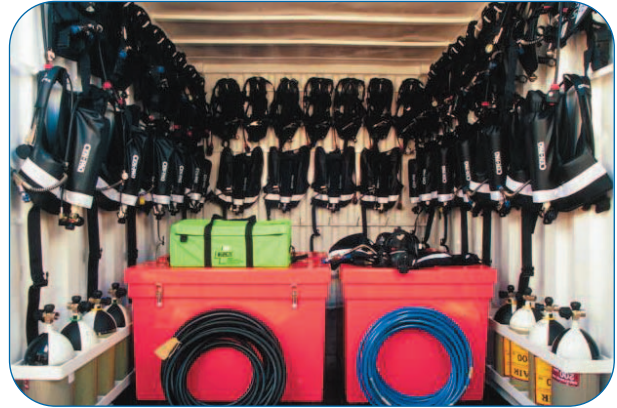

We have unrivalled experience of providing a complete service consisting of:

- Containerised cascade high pressure compressor, storage and distribution system via airline to critical areas.
- State of the art gas detection and respiratory systems provide early warning of toxic gas and protection against that risk.
- Specialist manpower to undertake training using DVD training aids, fully supported by theoretical and practical sessions.
- Experienced personnel on site to undertake gas checks, review contingency plans, undertake safety induction and awareness training and check on the deployment and functionality of protective equipment.
- Full maintenance support both on site via our containerised systems and via our dedicated onshore workshops.

Systems, training and equipment can be tailored to meet client specific needs, whether on or offshore and our dedicated manpower teams and equipment ensure that we have the resource to support your specific needs.

Tyco Fire & Integrated Solutions carry formal accreditation to ISO 9001:2000 for Quality Management, ISO 14001 for Environmental Management and OHSAS 18001 for Occupational Health and Safety.

We pride ourselves in our proven performance record in this potentially hazardous environment and can demonstrate a strong commitment to customer care.
